

SUBSTITUTE ABSTRACT

ABSTRACT OF THE DISCLOSURE

An artificial miniature landscape model includes a plurality of multi-colored LEDS, metallic conductor branches, electrically insulated conductors, heat shrink bushings, or insulation tubular plugs, or internally or externally threaded tubular connectors, a low voltage rectifier, base connectors, molded artifacts, and pots. A plurality of variable colored LEDS are affixed to a molded transparent resin structure of an artificial flower, fruit, bird, leaf or butterfly to exhibit a three dimensionally colored lighting effect. Further, connectors are provided for connection of electrical conductors that supply power to illuminate the LEDS and to operate electrical devices that accompany the miniature landscape model.
